

Art Year 10 Long term plan 2020/2021

Autumn Term
<p>1. My Environment</p> <p>This is the introductory project to the GCSE course and as such will establish expectations and give pupils the guidance and instruction for making the most of their work. The theme focuses on landscape and objects in the landscape. Observational drawing will be an important aspect whilst experimenting with different media will give students the opportunity to produce work to a high quality. Critical and contextual references will also be important and pupils will be expected to participate in class discussion, discuss and review their work and that of their peers and make independent decisions that reflect an awareness of their own learning.</p>
Spring Term
<p>2. My Environment - continued</p>
Summer Term
<p>3. Fragments/Reflections</p> <p>The second project in the GCSE course will build on skills and techniques established previously. The theme is taken from last year's Externally Set Assignment and should encourage individual interpretation. Work will be developed from the initial study of artists. Again, observational drawing will play a key roll with particular emphasis on tone and composition. Any weaknesses from the last project should be recognized and rectified in this one.</p>

Subject to COVID-19 restrictions and guidelines
