ACHIEVEMENT FOR ALL

Directors: Mrs J Gardiner and Mrs R Smith
Headteacher: Ms S Dangerfield

22nd March 2024

Dear Parents/Carers

As a part of our Computing lessons, a variety of online Web 2.0 applications are used as a resource to enhance the curriculum. Using these tools is an essential component of teaching and learning in today's world. By using these resources, students may collaboratively create, edit, and share files and websites for school-related projects.

We would like for our students to begin learning how to use ICT to design products by creating an account on a 3D modeling website called **Tinkercad**. They will use online tools to build 3D objects out of shapes and other elements to create final designs.

Tinkercad accounts are open to Tinkerers of all ages, but when younger Tinkerers (the website's name for their younger users) start to use the site, Tinkercad asks that parents/carers allow teachers to create class accounts so that an adult can approve and moderate the child's account.

Teachers can approve children directly using their teacher email and student code for their class. Students can then log in with either the class code and a nickname (assigned by the teacher) or a username and password that they create, and then go to the LEARN pages to start designing. Students, when logging in, may be asked for their assigned nickname, the school code (provided at login), their school email address, a username (assigned by the teacher) and potentially a password. No other personal information will be required.

For more information about Tinkercad you can visit their home web site at <https://www.tinkercad.com>. You can also check out their [Children's Privacy Policy](http://bit.ly/tinkercadprivacy) at the following web address <http://bit.ly/tinkercadprivacy>.

After reviewing this site, if you are happy for your child to work with this online design tool, Tinkercad, please sign and return this page (page 2 only) to the school office.

Yes, I give permission for you to create a student account for my child and allow my child to use Tinkercad. I consent to the collection, use and disclosure of information about my child as set forth in Tinkercad's privacy policy.
